Geriatric Care	12

Lippincott's Nursing Skills & Procedures

Fundamentals

1. Admission
2. Advance directives
3. Air-fluidized therapy bed

Alignment and pressure-reducing devices

4. Cradle boot application
5. Abduction pillow application
6. Trochanter roll application
7. Hand roll application

8. Ambulation, progressive
9. Applying a belt restraint
10. Applying a body restraint
11. Applying a limb restraint
12. Applying a mitt restraint
13. Applying a vest restraint
14. Assessment techniques
15. Back care
16. Bariatric beds
17. Basic sterile technique
18. Bed bath

Bedpan and urinal

19. Bedpan placement
20. Urinal placement
21. Blood pressure assessment
22. Body mechanics
23. Canes
24. Care plan preparation
25. Combing and brushing a patient's hair
26. Communicating with difficult patients
27. Credé's maneuver
28. Crutches
29. Discharge
30. Documentation
31. Dying patient care
32. Eye care
33. Fecal impaction removal, digital
34. Feeding
35. Foot care
36. Four person carry lift
37. Four person lift
38. Four person lift sheet transfer
39. Hearing aid care
40. Height measurement
41. Hour of sleep care

Impaired swallowing and aspiration precautions

42. Impaired swallowing and aspiration precautions for a patient with oropharyngeal dysphagia
43. Impaired swallowing and aspiration precautions for a patient receiving speaking valve trials
44. Impaired swallowing and aspiration precautions for a patient with a tracheostomy or endotracheal tube

45. Impaired swallowing and aspiration precautions for a patient with a feeding tube

46. Impaired swallowing and aspiration precautions for a patient with esophageal dysphagia

47. Intake and output assessment

48. Making an occupied bed

49. Making an unoccupied bed

Male incontinence device

50. Applying a male incontinence device

51. Removing a male incontinence device

Mouth care

52. Mouth care, performing

53. Mouth care, supervising

54. Nutrition screening

55. Passive range-of-motion exercises

56. Perineal care of the female patient

57. Perineal care of the male patient

58. Physical assessment

59. Postmortem care

60. Postoperative care

61. Preoperative care

Pulse

62. Apical pulse assessment

63. Radial pulse assessment

64. Apical-radial pulse assessment

65. Rectal temperature assessment

66. Respiration assessment

Rigid contact lens care

67. Rigid contact lens insertion

68. Rigid contact lens removal

69. Rotation beds

70. Sexual assault examination

71. Shampooing a bedridden patient's hair

Shaving

72. Using a safety razor

73. Using an electric razor

74. Skin preparation, preoperative

75. Sliding board transfer

Soft contact lens care

76. Soft contact lens insertion

77. Soft contact lens removal

78. Spiritual care

Supplemental bed equipment

79. Bed board

80. Bed frame with trapeze

81. Foot cradle (sectional) with one side arm

82. Foot cradle (sectional) with two side arms

83. Foot cradle, one piece

84. Footboard

85. Overbed cradle

86. Pressure pad, alternating

87. Water mattress, portable

88. Surgical site verification

Temperature assessment

- 89. Tympanic thermometer use
- 90. Oral temperature assessment
- 91. Auxiliary temperature assessment

- 92. Tilt table
- 93. Transfer from bed to wheelchair
- 94. Transfer to an acute-care facility
- 95. Transfer to an extended-care facility
- 96. Transfer of a patient within a facility
- 97. Transfer with a hydraulic lift
- 98. Tub baths and showers
- 99. Turning frames
- 100. Using a low-air-loss therapy bed
- 101. Walkers

Weight measurement

- 102. Standing scale
- 103. Digital bed scale
- 104. Chair scale

Infection Control

- 105. Airborne precautions
- 106. Contact precautions
- 107. Droplet precautions
- 108. Hand hygiene
- 109. Immunization guidelines
- 110. Neutropenic precautions
- 111. Putting on isolation garb
- 112. Removing isolation garb
- 113. Reportable diseases
- 114. Standard precautions
- 115. Surgical asepsis, hand scrub
- 116. Surgical asepsis, maintaining a sterile field
- 117. Surgical asepsis, surgical attire

Specimen Collection and Testing

- 118. 12- or 24-hour timed urine collection
- 119. 2-hour timed urine collection
- 120. Arterial puncture for blood gas analysis
- 121. Bedside hemoglobin test
- 122. Blood culture

Blood glucose tests

- 123. Reagent strips
- 124. Blood glucose monitor

Bone marrow aspiration and biopsy

- 125. Bone marrow aspiration
- 126. Bone marrow biopsy

- 127. Collecting a clean-catch urine specimen
- 128. Collecting a middle ear specimen
- 129. Collecting a nasopharyngeal specimen
- 130. Collecting a random stool sample
- 131. Collecting a random urine specimen
- 132. Collecting a rectal specimen
- 133. Collecting a timed stool sample
- 134. Collecting a throat specimen
- 135. Collecting a wound specimen
- 136. Collecting an external ear specimen
- 137. Collecting an eye specimen
- 138. Collecting an indwelling catheter specimen

Fecal occult blood tests

- 139. Fecal occult blood tests, Hematest tablets

- 140. Fecal occult blood tests, Hemoccult slides

- 141. Lumbar puncture
- 142. Papanicolaou test
- 143. Skin biopsy
- 144. Sputum collection by expectoration
- 145. Sputum Collection by tracheal suctioning
- 146. Straining urine for calculi

Urine glucose and ketone tests

- 147. Urine glucose test, oxidase strips
- 148. Urine ketone tests

- 149. Urine pH

Urine specific gravity

- 150. Urine specific gravity with a urinometer
- 151. Urine specific gravity with a refractometer
- 152. Urine specific gravity with a reagent strip

- 153. Venipuncture

Physical Treatments

- 154. Applying a breast binder
- 155. Applying a knee-length antiembolism stocking
- 156. Applying a scultetus binder
- 157. Applying a straight abdominal binder
- 158. Applying a surgical wound dressing
- 159. Applying a surgical wound dressing with a drain
- 160. Applying a T- binder
- 161. Applying a thigh-length antiembolism stocking
- 162. Applying a waist-length antiembolism stocking
- 163. Applying an elastic bandage
- 164. Closed-wound drain management

Cold application

- 165. Cold compress or pack application
- 166. Ice bag, collar, K-pad, or chemical cold pack use

Direct heat application

- 167. Hot water bottle, heating pad, K-pad, or hot pack use
- 168. Warm compress or pack application

- 169. Hyperthermia-hypothermia blanket

- 170. Pouching a wound

- 171. Pressure dressing application

- 172. Radiation implant therapy

- 173. Radiation therapy, external

- 174. Radioactive iodine therapy

Sequential compression therapy

- 175. Sequential compression therapy
- 176. Sequential compression therapy, discontinuing

- 177. Sitz bath

- 178. Skin staple and clip removal

- 179. Soaks

- 180. Suture removal

- 181. Tepid water sponge bath

- 182. Therapeutic bath

- 183. Traumatic abrasion

- 184. Traumatic amputation

- 185. Traumatic laceration
- 186. Traumatic puncture wound
- 187. Vacuum-assisted closure pressure therapy
- 188. Wound dehiscence and evisceration
- 189. Wound irrigation

Drug Administration

- 190. Admixture of drugs in a syringe using two multidose vials
- 191. Admixture of drugs in a syringe using a multidose vial and ampule
- 192. Admixture of drugs in a syringe using two ampules
- 193. Applying a transdermal patch
- 194. Applying eye ointment
- 195. Applying transdermal ointment
- 196. Buccal and sublingual drug administration
- 197. Chemotherapeutic drug administration
- 198. Chemotherapeutic drug preparation and handling
- 199. Drug infusion through a secondary I.V. line
- 200. Eardrop instillation
- 201. Endotracheal drug administration
- 202. Epidural analgesic administration
- 203. Gastrostomy tube drug instillation
- 204. I.V. bolus injection
- 205. Inserting a vaginal suppository
- 206. Inserting vaginal ointments, creams, or gels
- 207. Instilling eye drops
- 208. Instilling nose drops
- 209. Intermittent infusion device, drug administration
- 210. Intradermal injection
- 211. Intramuscular injection
- 212. Intraosseous infusion
- 213. Intrapleural drug administration
- 214. Iontophoresis
- 215. Nasogastric tube drug instillation
- 216. Ommaya reservoir drug infusion
- 217. Oral drug administration
- 218. Rectal ointment application
- 219. Rectal suppository administration
- 220. Subcutaneous drug implants
- 221. Subcutaneous injection
- 222. Subdermal drug implants
- 223. Topical skin medication application
- 224. Translingual drug administration
- 225. Using a dry-powder inhaler
- 226. Using a medicated eye disk
- 227. Using a meter dose inhaler
- 228. Using a nasal aerosol
- 229. Using a nasal inhaler
- 230. Using a nasal spray
- 231. Z-track injection

Intravascular Therapy

- 232. Accessing a side-entry implanted port
- 233. Accessing a top-entry implanted port
- 234. Administering a bolus injection into an implanted port

- 235. Administering a continuous infusion into an implanted port
- 236. Administering a drug through a PICC line
- 237. Assisting with implanted port insertion
- 238. Autologous blood transfusion, perioperative
- 239. Autologous blood transfusion, preoperative
- 240. Blood sampling from a central venous access device
- 241. Calculating and setting a drip rate
- 242. Changing a central venous access device injection cap
- 243. Changing an I.V. dressing
- 244. Changing I.V. solution
- 245. Changing I.V. tubing
- 246. Flushing a central venous access device
- 247. I.V. pumps
- 248. Inserting a central venous access device
- 249. Inserting a peripherally inserted central catheter
- 250. Inserting an intermittent infusion device
- 251. Lipid emulsion administration
- 252. Making an I.V. time tape
- 253. Parenteral nutrition administration
- 254. Parenteral nutrition, monitoring
- 255. Parenteral nutrition, changing equipment
- 256. Parenteral nutrition preparation at home
- 257. Patient-controlled analgesia
- 258. PICC dressing change
- 259. Peripheral I.V. catheter insertion
- 260. Preparing a non-vented bottle
- 261. Preparing a vented bottle
- 262. Preparing an I.V. bag
- 263. Priming the I.V. tubing
- 264. Removing a central venous access catheter
- 265. Removing a peripheral I.V. catheter
- 266. Removing a peripherally inserted central catheter
- 267. Transfusion of whole blood and packed cells
- 268. Transfusion reaction management
- 269. Volume-control set

Cardiovascular Care

- 270. Applying a pneumatic antishock garment
- 271. Arterial and venous sheath removal
- 272. Automated external defibrillation
- Cardiac monitoring*
 - 273. Cardiac monitoring
 - 274. Telemetry monitoring
- 275. Cardiac output measurement with iced injectate
- 276. Cardiac output measurement with room temperature injectate
- 277. Cardioversion, synchronized
- 278. Care of a patient before and during angioplasty
- 279. Care of a patient before and during balloon valvuloplasty
- 280. Care of the patient after angioplasty
- 281. Care of the patient after balloon valvuloplasty
- 282. Carotid sinus massage
- 283. Changing arterial line tubing
- 284. Code management

- 285. Collecting a blood sample from a closed arterial pressure monitoring system
- 286. Collecting a blood sample from an open arterial pressure monitoring system
- 287. Defibrillation
- 288. Doppler use
- 289. Electrocardiography
- 290. Electrocardiography, posterior chest lead
- 291. Electrocardiography, right chest lead
- 292. Electrocardiography, signal-averaged
- 293. Epicardial pacing
- 294. Epicardial pacing wire removal

Femoral compression

- 295. Femoral compression, application and maintenance
- 296. Femoral compression device removal
- 297. Inserting a pulmonary artery catheter
- 298. Inserting an arterial catheter
- 299. Inserting an intra-aortic balloon
- 300. Measuring central venous pressure with a water manometer

Monitoring the patient with an intra-aortic balloon

- 301. Monitoring the patient with an intra-aortic balloon
- 302. Weaning a patient from an intra-aortic balloon

- 303. Obtaining continuous CVP readings with a pressure monitoring system
- 304. One person rescue CPR
- 305. PAP monitoring and PAWP monitoring
- 306. Pericardiocentesis
- 307. Permanent pacemaker care

Pulse amplitude monitoring

- 308. Pulse amplitude monitoring
- 309. Pulse amplitude monitoring discontinuation
- 310. Removing a pneumatic antishock garment
- 311. Removing a pulmonary artery pressure catheter
- 312. Removing an arterial catheter
- 313. Removing an intra-aortic balloon
- 314. ST segment monitoring
- 315. Thoracic electrical bioimpedance monitoring
- 316. Transcutaneous pacing
- 317. Transducer system setup
- 318. Transthoracic pacing
- 319. Transvenous pacing
- 320. Two person CPR
- 321. Valsalva's maneuver
- 322. Ventricular assist device

Respiratory Care

- 323. Bedside spirometry
- 324. Blind nasotracheal intubation
- 325. Changing tracheostomy ties
- 326. Chest physiotherapy
- 327. Continuous positive airway pressure

Cricothyrotomy

- 328. Cricothyrotomy, using a needle
- 329. Cricothyrotomy, using a scalpel

- 330. Deflating and inflating a tracheostomy cuff
- 331. End-tidal carbon dioxide monitoring
- 332. Esophageal airway insertion
- 333. Esophageal airway removal
- 334. Humidifier therapy, bedside
- 335. Humidifier therapy, cascade bubble diffusion
- 336. Humidifier therapy, diffusion head
- 337. Humidifier therapy, vaporizers
- 338. Incentive spirometry
- 339. Inserting a chest tube
- 340. Intermittent positive-pressure breathing
- 341. Intubation with direct visualization
- 342. Laryngeal mask airway insertion
- 343. Latex allergy protocol
- 344. Manual ventilation
- 345. Mechanical ventilation, positive pressure
- 346. Mixed venous oxygen saturation
- 347. Mucus clearance device
- 348. Nasopharyngeal airway insertion and care
- 349. Nasotracheal suctioning
- 350. Nebulizer therapy- in-line
- 351. Nebulizer therapy- large volume
- 352. Nebulizer therapy- small volume
- 353. Nebulizer therapy- ultrasonic
- 354. Obstructed airway management for a conscious adult
- 355. Obstructed airway management for an obese or pregnant adult
- 356. Obstructed airway management for an unconscious adult

Oronasopharyngeal suction

- 357. Oronasopharyngeal suction
- 358. Oropharyngeal suction
- 359. Oropharyngeal airway insertion and care
- 360. Oxygen administration
- 361. Prone positioning
- 362. Pulse oximetry
- 363. Removing a chest tube
- 364. Removing an endotracheal tube
- 365. Repositioning the endotracheal tube
- 366. Thoracentesis
- 367. Thoracic drainage
- 368. Tracheal cuff pressure measurement
- 369. Tracheal suction in an intubated patient
- 370. Tracheostomy and ventilator speaking valve

Tracheostomy cannula care

- 371. Cleaning the stoma and outer cannula
- 372. Cleaning a nondisposable inner cannula
- 373. Caring for a disposable inner cannula
- 374. Tracheotomy
- 375. Weaning the patient from the ventilator

Neurologic Care

- 376. Assisting with Halo-vest traction application
- 377. Bispectral Index monitoring
- 378. Caring for a cerebral blood flow monitor insertion site
- 379. Caring for a patient with halo-vest traction
- 380. Inserting a lumbar subarachnoid drain

- 381. Inserting a ventricular drain
- 382. Intracranial pressure monitoring
- 383. Jugular venous oxygen saturation catheter removal
- 384. Jugular venous oxygen saturation monitoring
- 385. Monitoring CSF drainage
- 386. Neurologic vital sign assessment
- 387. Pain management
- 388. Peripheral Nerve Stimulation
- 389. Removing a cerebral blood flow sensor
- 390. Seizure management
- 391. Setting up cerebral blood flow sensor
- 392. Skull tong care
- 393. Transcranial Doppler monitoring
- 394. Transcutaneous electrical nerve stimulation application and use
- 395. Transcutaneous electrical nerve stimulation removal

Gastrointestinal Care

- 396. Clamping the T-tube
- 397. Colostomy and ileostomy, appliance care
- 398. Colostomy and ileostomy care, pouch emptying
- 399. Colostomy irrigation
- 400. Continent ileostomy care
- 401. Continuous transabdominal tube feedings
- 402. Duodenal and Jejunal tube feedings
- 403. Emptying T-tube drainage
- 404. Enema administration
- 405. Esophageal tube care
- 406. Esophageal tube insertion
- 407. Esophageal tube removal

Feeding tube insertion

- 408. Feeding tube insertion (nasal)
- 409. Feeding tube insertion (oral)
- 410. Feeding tube removal
- 411. Gastric lavage
- 412. Gastric tube feedings
- 413. Gastrostomy feeding button, enteral feeding
- 414. Gastrostomy feeding button reinsertion
- 415. Intermittent transabdominal tube feedings
- 416. Intra-abdominal pressure monitoring
- 417. Nasoenteric-decompression tube care
- 418. Nasoenteric-decompression tube insertion
- 419. Nasoenteric-decompression tube removal
- 420. Nasogastric tube insertion

Nasogastric tube irrigation

- 421. Nasogastric tube irrigation
- 422. Nasogastric tube instillation
- 423. Nasogastric tube monitoring
- 424. Nasogastric tube removal
- 425. Paracentesis, abdominal
- 426. Peritoneal lavage
- 427. Rectal tube insertion and removal
- 428. Re-dressing the T tube
- 429. Transabdominal tube exit site care

Renal and Urologic Care

- 430. Bladder irrigation, continuous

- 431. Bladder ultrasonography
- 432. Catheter irrigation
- 433. Continuous renal replacement therapy
- 434. Hemodialysis with a double-lumen catheter
- 435. Hemodialysis with arteriovenous access
- 436. Indwelling catheter care
- 437. Indwelling catheter insertion, female
- 438. Indwelling catheter insertion, male
- 439. Indwelling catheter removal
- Nephrostomy and cystostomy tube dressing change*
 - 440. Nephrostomy tube dressing change
 - 441. Cystostomy tube dressing change
- 442. Nephrostomy tube irrigation
- 443. Peritoneal dialysis
- Peritoneal dialysis, continuous ambulatory*
 - 444. Peritoneal dialysis (continuous ambulatory), discontinuing
 - 445. Peritoneal dialysis (continuous ambulatory), infusion
- 446. Peritoneal dialysis dressing change
- 447. Self-catheterization, females
- 448. Self-catheterization, males
- 449. Urinary diversion stoma care

Orthopedic Care

- 450. Applying a cotton-polyester cast
- 451. Applying a fiberglass cast
- 452. Applying a plaster cast
- 453. Applying a rigid splint
- 454. Applying a spine board
- 455. Applying a traction splint
- Bone growth stimulation, electrical*
 - 456. Bone growth stimulation (direct current stimulation)
 - 457. Bone growth stimulation (electrical), percutaneous
 - 458. Bone growth stimulation (electromagnetic)
- 459. Caring for a patient in traction
- 460. Cast removal
- 461. Cervical collar
- Clavicle strap application*
 - 462. Clavicle strap application (figure-eight)
 - 463. Clavicle strap application (4" elastic bandage)
- 464. Continuous passive motion device
- 465. External fixation
- 466. Hip arthroplasty care
- 467. Internal fixation
- 468. Knee arthroplasty care
- 469. Prosthesis care
- 470. Setting up a claw-type basic frame
- 471. Setting up an I.V.- type Balkan frame
- 472. Setting up an I.V.-type basic frame
- Stump care*
 - 473. Stump care
 - 474. Stump care, healed

Skin Care

- 475. Applying a foam dressing

- 476. Applying a hydrocolloid dressing
 - 477. Applying a hydrogel dressing
 - 478. Applying a moist saline gauze dressing
 - 479. Applying a transparent dressing
 - 480. Applying an alginate dressing
 - 481. Biological burn dressings
 - Burn care*
 - 482. Burn care, facial
 - 483. Burn care, ear
 - 484. Burn care, eye
 - 485. Burn care, nasal
 - Changing a burn dressing*
 - 486. Removing a dressing without hydrotherapy
 - 487. Applying a wet dressing
 - 488. Applying a dry dressing with a topical medication
 - 489. Hydrotherapy
 - 490. Laser therapy
 - 491. Mechanical debridement
 - 492. Preventing pressure ulcers
 - 493. Skin graft care
 - 494. Ultraviolet light therapy
 - 495. Unna's Boot application
- Eye, Ear, and Nose Care**
- 496. Applying an eye patch
 - 497. Applying a cold eye compress
 - 498. Applying a warm eye compress
 - 499. Ear irrigation
 - 500. Eye irrigation
 - 501. Nasal balloon catheters
 - 502. Nasal irrigation
 - 503. Nasal packing, anterior
 - 504. Nasal packing, posterior
- Behavioral Health Care**
- 505. Administering emergency psychotropic medications
 - 506. Advance directives for psychiatric care
 - 507. Applying leather-like or leather restraints
 - 508. Approaching a manipulative patient
 - 509. Approaching a passive-aggressive patient
 - 510. Assessing a patient for water intoxication
 - 511. Assessing a patient taking neuroleptic medications
 - 512. Assessing and caring for a patient with an acute dystonic reaction
 - 513. Assessing extrapyramidal symptoms
 - 514. Assessing for suspected child abuse
 - 515. Assessing for suspected domestic abuse
 - 516. Assessing for suspected elder abuse
 - 517. Assessing symptoms of tardive dyskinesia
 - 518. Assessment and management of heat intolerance
 - 519. Caring for a confused patient
 - 520. Caring for a patient in a manic episode
 - 521. Caring for a patient with a somatoform disorder
 - 522. Caring for a patient with active hallucinations

- 523. Caring for a patient with anorexia nervosa
- 524. Caring for a patient with borderline personality disorder
- 525. Caring for a patient with bulimia nervosa
- 526. Caring for a patient with conversion disorder
- 527. Caring for a patient with delirium
- 528. Caring for a patient with delusions
- 529. Caring for a patient with dementia
- 530. Caring for a patient with obsessive-compulsive disorder
- 531. Caring for a patient with schizophrenia
- 532. Caring for a patient with severe depression
- 533. Caring for a sexually provocative patient
- 534. Depression or hostility observation and precautions
- 535. Discharge from a psychiatric unit
- 536. Discharge from a psychiatric unit against medical advice
- 537. Duty to warn third parties of a threat
- 538. Electroconvulsive therapy
- 539. Elopement monitoring
- 540. Family therapy
- 541. Forming a no-suicide contract with a patient
- 542. Group work techniques
- 543. Handling patient valuables on a psychiatric unit
- 544. Informed consent, psychiatric patients
- 545. Involuntary admission to a psychiatric unit
- 546. Management of sharp or other restricted objects on a psychiatric unit
- 547. Managing an intoxicated patient
- 548. Monitoring visitation on a psychiatric unit
- 549. Oral drug administration, psychiatric patient
- 550. Patient dress code for a psychiatric unit
- 551. Photographing patients for identification
- 552. Quiet room use
- 553. Reality orientation
- 554. Relaxation and stress management techniques
- 555. Restraint use for a patient on a psychiatric unit
- 556. Restraints use for assaultive and violent behavior
- 557. Searching a patient's room a psychiatric unit
- 558. Seclusion for assaultive and violent behavior
- 559. Seizure management on a psychiatric unit
- 560. Shaving restricted-area psychiatric patients
- 561. Special nursing observation
- 562. Spiritual resources for psychiatric patients
- 563. Transfer of a patient from a general medical unit to a psychiatric unit
- 564. Transfer of a patient from the emergency department to the psychiatric unit
- 565. Using a metal detector to search a psychiatric patient
- 566. Using an expectorant shield
- 567. Violent and assaultive patient management
- 568. Voluntary admission to a psychiatric unit

Maternal-Neonatal Care

- 569. Amniocentesis
- 570. Amnioinfusion
- 571. Amniotic fluid assessment using Nitrazine tape

572. Amniotic fluid assessment using the fern test
 573. Amniotomy
 574. Antepartum external cephalic version
 575. Apgar scoring
Apnea monitoring
 576. Apnea monitoring using an apnea mattress
 577. Apnea monitoring
 578. Assessing neonatal heart rate
 579. Assessment of a patient in false labor
 580. Assisting with intrauterine device insertion
 581. Assisting with intrauterine device removal
 582. Baptism of a neonate
 583. Barlow and Ortolani maneuvers
 584. Birthing ball use
 585. Bladder catheterization during labor
 586. Blood withdrawal from an umbilical artery catheter
 587. Bottle-feeding of the neonate
 588. Breast care for non-nursing mothers
 589. Breast milk handling
 590. Breast-feeding assistance
Breast pumps
 591. Breast pump, battery-powered or electric
 592. Breast pump, manual
 593. Breathing techniques during labor
 594. Caput succedaneum care, neonate
 595. Carboprost tromethamine administration for postpartum hemorrhage
 596. Care of a patient after fetal demise
 597. Care of a patient after tubal ligation
 598. Care of a patient in labor
 599. Care of a patient in labor with epidural anesthesia
 600. Care of a patient undergoing intrauterine fetal blood transfusion
 601. Care of a patient with a breech presentation
 602. Care of a patient with abruptio placenta
 603. Care of a patient with an amniotic fluid embolism
 604. Care of a patient with an ectopic pregnancy
 605. Care of a patient with cardiac disease during pregnancy and labor
 606. Care of a patient with hyperemesis gravidarum
 607. Care of a patient with placenta previa
 608. Care of a patient with premature rupture of membranes
 609. Care of a patient with uterine rupture
 610. Care of a pregnant patient with chronic hypertension
 611. Care of a pregnant patient with disseminated intravascular coagulation
 612. Cephalohematoma care, neonate
 613. Cerclage placement
 614. Cervical ripening using prostaglandin
 615. Chorionic villi sampling
 616. Colposcopy
 617. Contraction stress test
 618. Cultural needs assessment during pregnancy
 619. Determining neonatal blood pressure
 620. Determining neonatal respiratory rate
 621. Dilation and curettage
 622. Dinoprostone (Cervidil) administration for cervical ripening
 623. Dinoprostone gel (Prepidil) administration for cervical ripening
 624. Drug withdrawal care, neonate
 625. Emergency delivery
 626. Endometrial biopsy
 627. Episiotomy care
 628. Evaluation of deep tendon reflexes in a pregnant patient
 629. Fetal assessment in a pregnant surgical patient
Fetal heart rate monitoring
 630. Fetal heart rate during labor, monitoring
 631. Fetal heart rate gestation, monitoring
 632. Fetal monitoring, external
 633. Fetal monitoring, internal
 634. Fetal scalp blood sampling
 635. Forceps delivery
 636. Fundal assessment, postpartum
 637. Gavage feeding of the neonate
 638. Hepatitis B vaccine administration in a neonate
 639. Hydrotherapy during labor
 640. Hysterectomy care
 641. Intrauterine device insertion
 642. Intrauterine device removal
 643. Kegel exercises
 644. Loop electrosurgical excision
 645. Magnesium sulfate administration
 646. Mastitis care
 647. McRoberts maneuver
 648. Misoprostol administration for cervical ripening
 649. Neonatal eye prophylaxis
 650. Neonatal male circumcision
 651. Neonatal size measurements
 652. Nipple stimulation
 653. Non-stress test
 654. Obstetric triage of patients
 655. Oxytocin administration after delivery
 656. Oxytocin administration during labor and delivery
 657. Performing an episiotomy
 658. Perineal care during and after labor
 659. Phototherapy
 660. Placenta examination
 661. Postoperative care for a patient having a cesarean birth
 662. Postpartum hemorrhage management
 663. Preoperative care for a patient having a scheduled cesarean birth
 664. Prolapsed umbilical cord assessment and management
 665. Promoting psychosocial adaptation in a neonate
 666. Puerperal infection care
 667. Responding to an infant abduction
 668. RhoGAM administration
 669. Rooming-in for neonates
 670. Rubella vaccine administration
 671. Taking a neonatal temperature

- 672. Terbutaline administration for premature labor
- 673. Thermoregulation after delivery
- 674. Thermoregulation in the nursery
- 675. Tocolytic therapy
- 676. Transvaginal ultrasound
- 677. Umbilical vessel catheter care, neonate
- 678. Umbilical vessel catheter insertion in a neonate
- 679. Umbilical vessel catheter removal in a neonate
- 680. Using a handheld resuscitation bag and mask with a neonate
- 681. Using a ventilator with a neonate
- 682. Using an oxygen hood with a neonate
- 683. Using continuous positive airway pressure with a neonate
- 684. Using nasal prongs with a neonate
- 685. Uterine atony management
- 686. Uterine contraction palpation
- 687. Vacuum extraction
- 688. Vaginal examination
- 689. Weighing a neonate

Pediatric Care

- 690. 12-lead electrocardiogram, child
- 691. 24-hour urine specimen collection, child
- 692. Access of an implanted port, child
- 693. Admission to floor, child
- 694. Admission to intensive care unit, child
- 695. Advance directive, child
- 696. Aerosol treatment, child
- 697. Arterial blood gas sampling using arterial puncture, child
- 698. Axillary temperature, child
- 699. Basic cooling measures, child
- 700. Basic warming measures, child
- 701. Bed scale, child
- 702. Blood gas sampling using an indwelling heparinized arterial or deep venous catheter, child
- 703. Blood glucose monitoring, child
- 704. Blood glucose monitoring, neonatal
- 705. Blood pressure, child
- 706. Blood sampling from a central venous access device, child
- 707. Blood sampling from a closed arterial pressure monitoring system, child
- 708. Blood sampling from an open arterial pressure monitoring system, child
- 709. Blood transfusion, child
- 710. Blood withdrawal through a tunneled catheter, child
- 711. Blood withdrawal through an implanted port, child
- 712. Bone marrow aspiration and biopsy, child
- 713. Bryant's traction
- 714. Capillary blood gas sampling, child
- 715. Cardiopulmonary resuscitation, child
- 716. Cardiopulmonary resuscitation, infant
- 717. Cardiopulmonary status monitoring, child
- 718. Care of a child in skeletal traction
- 719. Care of a child in skin traction

- 720. Care of a child with an external ventriculostomy device
- 721. Cast application, child
- 722. Cast care and assessment, child
- 723. Central venous access catheter removal, child
- 724. Central venous access device cap change, child
- 725. Central venous access device insertion, child
- 726. Central venous pressure monitoring, child
- 727. Chemically heated mattress use, infant
- 728. Chemotherapy administration, child
- 729. Chest physiotherapy, child
- 730. Chest tube drainage system collection device setup, child
- 731. Chest tube insertion, child
- 732. Chest tube maintenance and troubleshooting, child
- 733. Chest tube removal, child
- 734. Clean-catch (midstream) urine collection, female child
- 735. Clean-catch (midstream) urine collection, male child
- 736. Cleaning a tracheostomy stoma and outer cannula, child
- 737. Cleaning an inner cannula, child
- 738. Closed-wound drain management, child
- 739. Collecting a random urine specimen, pediatric female
- 740. Collecting a random urine specimen, pediatric male
- 741. Collecting a timed urine specimen, pediatric female
- 742. Collecting a timed urine specimen, pediatric male
- 743. Collecting a urine specimen for culture and sensitivity, pediatric female
- 744. Collecting a urine specimen for culture and sensitivity, pediatric male
- 745. Comprehensive neurologic assessment, child
- 746. Continuous drip enteral feeds, child
- 747. Cooling blanket, child
- 748. Cord care
- 749. Crib preparation
- 750. Determining gestational age of a neonate
- 751. Diapering an infant
- 752. Discharge of a child against medical advice
- 753. Discharge of a child to someone other than a primary caregiver or legal guardian
- 754. Discharge, child
- 755. Dressing surgical wounds with drains, child
- 756. Ear irrigation, child
- 757. Elbow restraints, child
- 758. Emptying and cleaning a stoma pouch, child
- 759. Endotracheal medication administration, child
- 760. Enema administration, child
- 761. Enteral medication administration, child
- 762. Enteral tube removal, child
- 763. Exchange transfusion, child
- 764. Extravasation management, child
- 765. Extubation, child
- 766. Eye drops, child

- 767. Eye ointment, child
- 768. Fall prevention, child
- 769. Fecal occult blood test, child
- 770. Fiberoptic phototherapy pads and blankets use, neonate
- 771. Finger and heel sticks, child
- 772. Flushing a central venous access device, child
- 773. Flushing a tunneled catheter in a child
- 774. Flushing an implanted port, child
- 775. Gastrointestinal decontamination, child
- 776. Gastrostomy tube change or replacement, child
- 777. General guidelines for performing a procedure on a child
- 778. Genitourinary and gastrointestinal assessment, neonate
- 779. Giving a subcutaneous injection, pediatric
- 780. Giving an intradermal injection, pediatric
- 781. Giving an intramuscular injection, pediatric
- 782. Giving oral medication to a toddler
- 783. Giving oral medication to an infant
- 784. Giving oral medication to an older child
- 785. Head circumference, infant
- 786. Health history interview and physical assessment, child
- 787. Heat lamp use, infant
- 788. Height, child older than age 2
- 789. Hemodynamic monitoring preparation, child
- 790. High-frequency ventilator use, child
- 791. Hip spica cast care
- 792. Hospital bed preparation, child
- 793. I.V. cardiovascular medication administration, child
- 794. I.V. dressing change, child
- 795. I.V. fat emulsion, child
- 796. I.V. therapy, pediatric
- 797. I.V. tubing change, child
- 798. Incentive spirometry, child
- 799. Indwelling catheter removal, child
- 800. Indwelling catheter urine collection, child
- 801. Indwelling enteral tube skin care and dressing change, child
- 802. Indwelling urinary catheter insertion, female child
- 803. Indwelling urinary catheter insertion, male child
- 804. Indwelling urinary catheter irrigation, child
- 805. Indwelling urinary catheter management, child
- 806. Informed consent, child
- 807. Infusion through a tunneled catheter, child
- 808. Infusion administration through an implanted port, child
- 809. Intermittent infusion device flushing, child
- 810. Intermittent or bolus enteral feeds, child
- 811. Intra-arterial pressure monitoring, child
- 812. Intracranial pressure monitor catheter insertion, child
- 813. Intracranial pressure monitoring, child
- 814. Intubation, child
- 815. Isolette preparation, infant
- 816. Length, infant younger than 24 months
- 817. Lumbar puncture, child
- 818. Measuring heart rate and respiratory impedance with a two-channel pneumogram in an infant
- 819. Measuring heart rate in a child
- 820. Measuring heart rate, respiratory impedance, airflow, and oxygen saturation with a four-channel pneumogram in an infant
- 821. Mechanical ventilator use, child
- 822. Mist tent therapy
- 823. Moderate sedation, child
- 824. Nasal medications, child
- 825. Nasogastric tube placement, child
- 826. Nasogastric tube removal, child
- 827. Nasopharyngeal airway insertion and care, child
- 828. Nasopharyngeal catheter oxygen administration, child
- 829. Nasotracheal suctioning, child
- 830. Nebulized medication administration, child
- 831. Neonatal screening
- 832. Neonate identification and footprinting
- 833. Noncoring needle removal from an implanted port, child
- 834. Obstructed airway management, child
- 835. Obstructed airway management, infant
- 836. Oral care, child age 3 and older
- 837. Oral care, infant
- 838. Oral care, toddler
- 839. Oral temperature, child
- 840. Oropharyngeal airway insertion and care, child
- 841. Otic medications, child
- 842. Pain assessment, child
- 843. Parenteral nutrition, child
- 844. Parent-infant bonding
- 845. Peak flow meter use, child
- 846. Pediculosis screening, child
- 847. Pediculosis treatment, child
- 848. Peripheral I.V. catheter removal, child
- 849. Peripherally inserted central catheter dressing change, child
- 850. Peripherally inserted central catheter flushing, child
- 851. Pet therapy, child
- 852. pH monitoring, child
- 853. Play audiometry
- 854. Poisoning management, child
- 855. Postanesthesia care, child
- 856. Postmortem care, child
- 857. Postural screening, child
- 858. Potassium infusion administration, child
- 859. Preoperative care, child
- 860. Pulse oximetry, child
- 861. Radiant warmer and Isolette
- 862. Range-of-motion exercises, child
- 863. Rectal medications, child
- 864. Rectal swab, child
- 865. Rectal temperature, child
- 866. Respiratory assessment, child
- 867. Scabies screening, child
- 868. Scabies treatment, child
- 869. Seizure, child

- 870. Self-catheterization, female child
- 871. Self-catheterization, male child
- 872. Skeletal pin site care, child
- 873. Spacer use, child
- 874. Sponge bath, neonate
- 875. Staple removal, child
- 876. Stoma care, child
- 877. Stool collection for ova and parasites, child
- 878. Stool collection for pinworms, child
- 879. Stool collection for rotavirus, child
- 880. Straight catheter urine specimen collection, child
- 881. Sublingual and buccal medications, child
- 882. Suprapubic aspiration urine specimen collection, child
- 883. Suture removal, child
- 884. Sweep screening, child
- 885. Temporal artery thermometer, child
- 886. Threshold test, child
- 887. Topical medications, child
- 888. Tracheostomy suctioning, child
- 889. Tracheostomy ties change, child
- 890. Transcutaneous blood gas monitoring, child
- 891. Transferring a child to another facility
- 892. Transferring a child to another room
- 893. Transferring a child to another unit
- 894. Transfusion reaction management, child
- 895. Tub bath, infant
- 896. Tunneled catheter site care and maintenance, child
- 897. Tympanic temperature, child
- 898. Vaccine administration, child
- 899. Venipuncture, child
- 900. Ventriculostomy catheter insertion, child
- 901. Vision screening, child
- 902. Vitamin K administration, neonate
- 903. Voided stool specimen, child
- 904. Warming blanket use, child
- 905. Weight, child
- 906. Weight, infant
- 907. Wound care, child

Geriatric Care

- 908. Drug therapy, older adults
- 909. Fall management
- 910. Fall prevention
- 911. Functional assessment
- 912. Incontinence management, fecal
- 913. Incontinence management, urinary
