

PREPARE FOR DISASTER

Comply with Federal Requirements to Train Your Staff for Emergency Preparedness and Disaster Response

If you receive federal preparedness response grants, your hospital must be compliant with the **National Incident Management System (NIMS)** courseware yearly training requirements. HealthStream has partnered with Yale New Haven Center for Emergency Preparedness and Disaster Response to distribute a two-course package focused on emergency preparedness for healthcare workers. The courses focus on Incident Command System (ICS) and a healthcare worker's role in providing continuous care for existing and additional patients in the event of an emergency. Successful completion of these courses covers the NIMS training requirement of four FEMA courses. Ensure your hospital is compliant with NIMS. Purchase and assign the NIMS Training Library today.

“The NIMS courseware authored by the Yale New Haven Center for Emergency Preparedness and Disaster Response expertly trained my staff on their appropriate roles in the event of a disaster. It also properly trained them on the use of the Incident Command System (ICS).”

Steven Trockman, MPH
Director, Southern Maine Regional Resource Center
Maine Medical Center

Impact:

Reduce Training Time

- This NIMS two-course package covers the requirement of four FEMA courses
- Save time on tracking non-HealthStream activities

Prepare for Disaster

- Train your staff on the purpose and features of the Incident Command System (ICS)
- Prepare your staff for their roles and responsibilities in an emergency or disaster
- Achieve compliance with the NIMS training requirements

Features:

- Interactive learning activities, web links, and exercises
- Brief quizzes to test comprehension of the material
- Documents an individual's completion of the course

The NIMS courseware educates healthcare workers on their role in the event of an emergency and describes the way an incident command system can provide a consistent approach to command and control during an emergency or disaster.

This library is essential for:

- NIMS requirements for IS-100, IS-200, IS-700 and IS-800

This library supports:

- The Joint Commission (EC 4.10) and Centers for Medicare and Medicaid Services (CMS, 482.42A1) requirements for emergency management training and educating staff on environment of care guidelines
- The Joint Commission (EC 4.10) requirements for incident management structure training

Courses in Library

Introduction to Emergency Management with NIMS: A 40-minute awareness-level course that helps health care workers understand their role in providing continuous care for existing patients and additional patients in the event of an emergency.

Incident Command Systems (ICS) for Health Care with NIMS: A 1-hour and 15-minute intermediate course for healthcare workers that describes the way an incident command system can provide a consistent approach to command and control during an emergency or disaster.

Subject Matter Experts
