

PROTECT YOUR STAFF

Train Employees on Safety Issues in The Healthcare Environment

Protecting healthcare workers from illness and infection while on the job is an essential hospital function. OSHA mandates appropriate training that prepares hospitals and healthcare workers to protect themselves and patients. The OSHA Library from Yale New Haven Center for Emergency Preparedness and Disaster Response contains essential compliance-based courseware that includes training on N95 fit testing, personal protective equipment, tuberculosis, and bloodborne pathogens. These courses are designed to help your organization meet OSHA training requirements and improve employee competency.

Use the OSHA Library from Yale New Haven Center for Emergency Preparedness and Disaster Response to meet Joint Commission and Homeland Security Preparedness Recommendations.

Impact:

Meet OSHA Training Requirements

- N95 Respirator and PPE training
- Use effective infection prevention measures

Increase Staff Safety
