

DEVELOP PICU NURSES FASTER

Combine Didactic and Practical Education to Prepare Trainees for Clinical Responsibilities

Caring for an injured pediatric patient requires a distinctive, holistic approach that utilizes a multi-disciplinary team. Provide nurses at your facility with the specialized training necessary to be successful in this field by implementing **Pediatric Intensive Care Orientation**, a critical part for all training programs focused on assessments and interventions for critically-ill children. This course from the Indiana University School of Nursing (IUSON) has been recognized by Sigma Theta Tau for its innovative and creative approach to learning. It builds on a core didactic component with a clinical practicum based on the preceptor model. The clinical practicum is essential for reinforcing conceptual knowledge and preparing novice nurses to work in the PICU. This course also offers trainees a Virtual Center of Best Practices for evidence-based research abstracts, national protocols, and clinical practice guidelines. The Pediatric Intensive Care course is unique because of the way these three components work together to deliver a well-rounded, comprehensive educational experience.

“This course has been instrumental in preparing new PICU nurses to effectively care for patients. It covers critical care concepts thoroughly and it also teaches students important interpersonal skills that are essential when dealing with critically sick children and their families.”

Johanna Senyk, RNC, MSN
Clinical Educator
St. Alexius Medical Center

Impact:

Improve Employee Competence

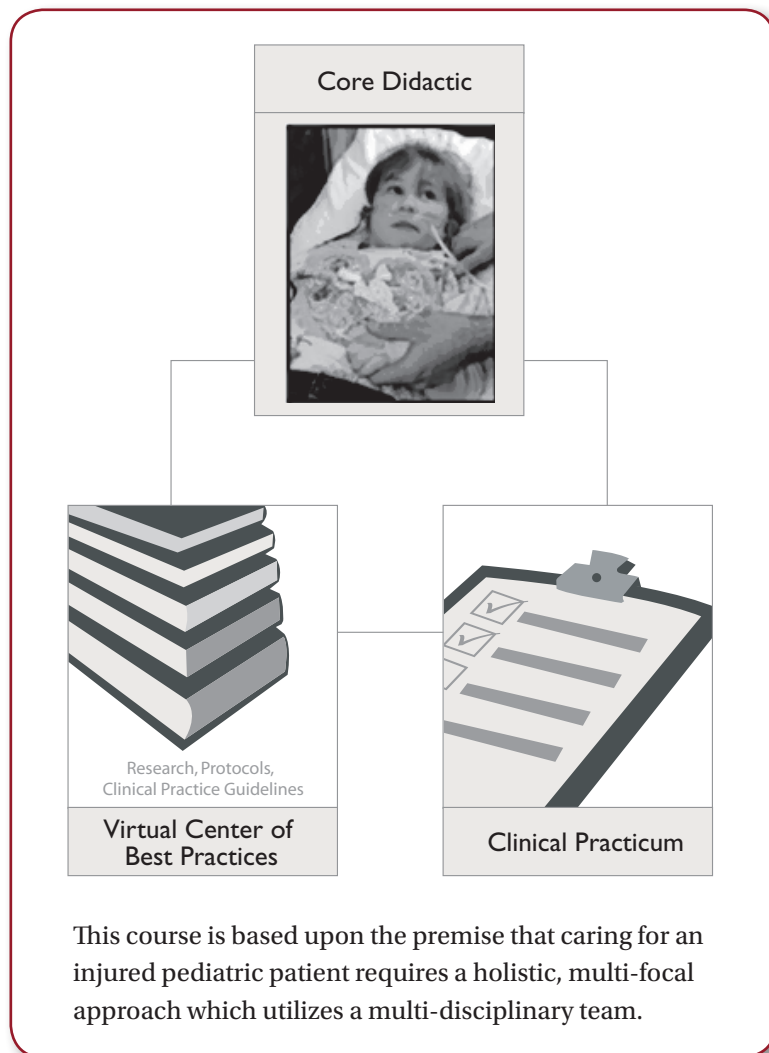

- Offer trainees a clinical practicum to support theoretical knowledge
- Prepare staff to proficiently handle issues that are unique to children

Reduce Costs

- Save money by decreasing costly classroom expenses
- Focus education resources on the practical application of skills

Features:

- Virtual Center of Best Practices
- Didactic and clinical practicum components
- Interactive learning activities, web links, and exercises
- Critical-thinking vignettes
- Supplemented by Adult Critical Care and Neonatal Intensive Care courses (also available from IUSON)

This course is essential for:

- Pediatric Intensive Care Unit orientation

This course supports:

- Annual CE Requirements for Nursing
- Promoting Professional Development

Course Outline

IUSON Pediatric Intensive Care includes the following modules:

- Psychosocial
- Respiratory
- Cardiovascular
- Comfort
- Neurology
- Gastrointestinal
- Renal/Endocrine
- Hematology/Immunology
- Multi-Systems

Continuing Education Credit

The Indiana University School of Nursing Office of Lifelong Learning is accredited as a provider of continuing nursing education by the American Nurses Credentialing Center's Commission of Accreditation. This course is provided by the Indiana University School of Nursing for 45 contact hours.

Subject Matter Experts

The development of these courses was funded by a grant from the Fund for the Improvement of Postsecondary Education (FIPSE), LAAP program to the Indiana University School of Nursing with partner organizations Clarian Health Partners and the American Association of Critical-Care Nurses.

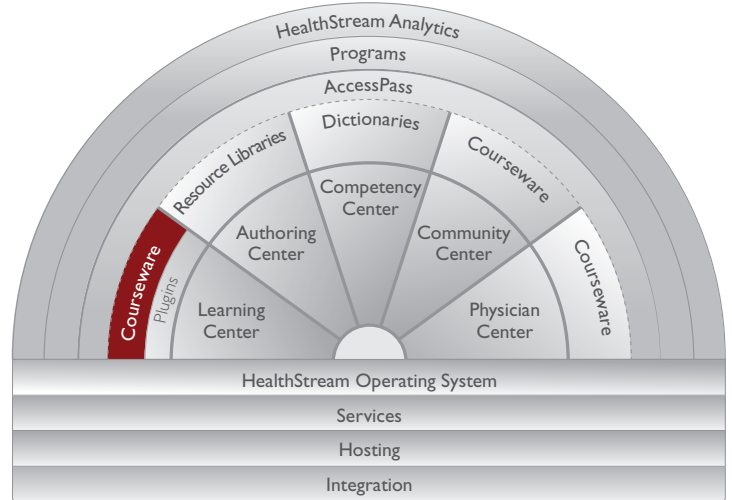

User Scale

- novice
- advanced beginner
- competent
- proficient
- expert

Recommended For:

- Pediatric Intensive Care nurse trainees
- Critical Care nurse trainees
- Emergency department/area nurses

HealthStream's Integrated Solutions

About HealthStream

HealthStream (NASDAQ: HSTM) is a leading provider of research and learning solutions for the healthcare industry. HealthStream focuses on turning "Insight into Action" for leading healthcare providers and suppliers through continuous measurement and adaptive learning.
