

Provide Your Organization With Flexible and Cost-effective Access to HealthStream Libraries

The HealthStream AccessPass provides your organization with a flexible and cost effective way to purchase access to certain HealthStream courseware libraries, and enable your employees to assign and utilize courseware based on their unique and specific needs.

AccessPass is as easy as 1-2-3!

1. Purchase Points for your organization (\$5000.00 minimum purchase). Free Points are awarded with volume purchases as follows:

| | Price | Points | Value |
|--------|----------|--------|------------------|
| Tier 1 | \$5,000 | 5,125 | 2.5% Free Points |
| Tier 2 | \$10,000 | 10,500 | 5% Free Points |
| Tier 3 | \$25,000 | 26,875 | 7.5% Free Points |
| Tier 4 | \$50,000 | 55,000 | 10% Free Points |

2. Use your Points to select from the AccessPass approved list of products and services as identified in the HealthStream catalog by the AccessPass logo. 

Each product and service has an assigned Point value detailed in the catalog. Each time an employee self-enrolls or is assigned a course, the respective Point value is deducted from your organization's Point balance.

3. Monthly Point usage reports will be emailed to you so you can monitor your remaining Point balance and always know where you stand.

See reverse side for provider summaries.

Provider Summaries

Please reference the HealthStream course catalog for individual course titles

APS: Advanced Fetal Monitoring & Assessment (7 courses)

Developed under the aegis of the American College of Obstetricians and Gynecologists (ACOG), the Advanced Fetal Monitoring & Assessment program focuses on best practices in electronic fetal heart monitoring (EFM), a key component of perinatal medicine. The program is divided into seven modules, each centered on a different area of EFM. All of the modules are case-based and include a wide range of ancillary resources such as expert opinions, animations, and links to papers. Courses were written and reviewed by well respected clinicians including Roger Freeman MD, FACOG and Bonnie Flood Chez RNC, MSN.

HCPPro: Coding (40 courses)

HCPPro's library provides training on inpatient ICD-9-CM coding and outpatient CPT coding for new coders as well as experienced veterans. The courses include clear explanations of coding guidelines for various procedures and diagnoses, coding case studies, and a final exam. Codes and coding rules change constantly, so coders need to stay up to speed on the latest information. The HCPPro Coding Library is a convenient way for organizations to help their coders get the ongoing education they need.

HCPPro: Corporate Compliance (14 courses)

HCPPro's Corporate Compliance courses are designed to not only provide the general healthcare staff with a basic overview of corporate compliance but also provide key professionals (billers and coders, medical staff, nurses, etc.) with more detail on corporate compliance. These courses help minimize the risk of harsh penalties from the federal government by educating your staff on the basics of the Office of Inspector General's (OIG) Medicare/Medicaid fraud and abuse regulations as well as methods for increasing patient safety.

HealthStream: Patient Safety (24 courses)

HealthStream's Patient Safety Series is designed to address today's most compelling and problematic patient safety issues, including: blood product safety, medication, patient communication and identification, adverse events, and more. Based on law, regulation, standards of practice, and industry trends, the Patient Safety Series helps you comply and improve outcomes concerning the JCAHO National Patient Safety Goals, Universal Protocol, prevalent sentinel events, CMS initiatives and more.

HIPAA eCollege: HIPAA (19 courses)

The HIPAA e-College Library is an introductory and role-based, scenario-specific HIPAA e-learning solution that helps covered entities address their compliance training needs through the use of interactive and user-friendly courses. Knowledgeable HIPAA experts, such as Mary Brandt - nationally recognized in the areas of patient privacy, information security and regulatory compliance - and instructional designers developed and designed the curriculum. Courses are offered on an overview and a job specific level for staff such as clinicians, HIM personnel, and various levels of technicians and administrative staff.

InfoSource: Desktop Skills (45 courses)

InfoSource offers Microsoft Office Specialist Approved Courseware for Microsoft Office applications, as well as training for computing basics, operating systems, e-mail, Internet, and many other titles. Recipients of numerous awards for design, instructional value, and ease of use, InfoSource courses include simulated application environments, audio narration and sound clips, as well as animations and user tips.

PFS KnowledgeTrek: Revenue Cycle Management (80 courses)

The internet-based Revenue Cycle Education Program will jump start your team's productivity through a layered learning approach, introducing critical revenue cycle concepts, elements, and activities that focus on creating a competent self-reliant staff. Patient Access and Patient Accounts staff who best understand the entire revenue cycle process and who can offer relevant solutions will prevail in adding efficiency and, most importantly, in positively impacting your bottom line.

Prentice Hall: Clinical & Practical Skills (220 Courses)

Prentice Hall Clinical & Practical Skills offers the only online skills series with video designed to help clinicians visualize how to perform nursing skills. The Prentice Hall library consist of interactive skill modules with comprehensive procedures and rationales demonstrated in hundreds of realistic video clips, animations, illustrations, and photographs. For each skill, clinicians will review the purpose, equipment, preparation, procedure, post-procedure information, expected outcomes, documentation, and variations (if applicable).

QuicKnowledge: Management & Leadership (70 courses)

QuicKnowledge offers soft skills training designed to meet the professional and personal development needs of all your employees. The courses deliver practical working knowledge in a short time by focusing on the few fundamentals that have the greatest impact on overall performance. Each course presents a primary level of material in approximately 30 minutes.

Visible Productions (1 course)

Developed with the help of Dr. Michael Leonard, a physician leader in Patient Safety for Kaiser Permanente and the Institute for Healthcare Improvement (IHI), *The Human Factor: Effective Teamwork and Communication* is a one of a kind program featuring interactive online courses that deliver practical techniques for improving communication, effective strategies for changing your institution's safety culture, and proven solutions to teamwork problems.
