Live Events for NRP (Connect)

In response to customer feedback, we are adding functionality to our NRP Solution. Live Events for NRP (Connect) now allows customers to continue to have students use their own LMS, while gaining extra Live Event functionality. Previously, Live Event access was available only to customers logging directly into HealthStream's platform. Now, every administrator can have this enhanced management functionality.

CONNECT (REGULAR)	CONNECT PLUS LIVE EVENTS FOR NRP
Students must register themselves for Live Events.	Administrators and Instructors may register students for Live Events, or students may still register themselves.
All Live Events must be marked as Cross-Organizational (open to everyone searching for an NRP Instructor-Led Event).	Events can be marked as Cross-Organizational, or you can choose to only allow students from your organization to see your events.
Instructors must manage all aspects of events themselves.	Administrators may be used to schedule, register, and manage all resources for events. Instructors must still grade all students.
Instructors must re-enter Resources, such as locations, for each event.	Resources only need to be entered once and are automatically saved for future use.
	Access to manage Live Events may be customized by giving individuals at the facility different roles. Roles include NRP Administrator, Resource Manager, and Event Manager.

HOW DOES IT WORK?
An administrator or instructor will complete the following steps:

1. Determine who will be the Lead NRP Administrator. This person will be in charge of assigning roles to administrators and instructors.
2. Assign *HealthStream for NRP Management Curriculum* from your own LMS to teach all Instructors and Admins the new functionality that they will be using.
3. Lead administrator will then assign roles to the designated individuals in the organization.
4. A designated individual will set-up all the resources (ex: buildings, rooms, equipment) for the organization in the system. This is an optional step.
5. When it is time to set-up events, an administrator or instructor will log in to a special link where he or she will be able to schedule events and register students.
6. After an event has occurred, an instructor will log back in through the special link to grade all the students.
7. Once graded, students will be able to log back into the course through your LMS to finish the final evaluation.
8. eCards will be automatically available to students through the course link after the final evaluation is complete.
