Reimagine the Provider Onboarding Experience with CredentialStream + Onboard

Provider onboarding is an essential process that improves satisfaction and reduces turnover, ultimately increasing revenue and provider engagement. Onboard enables you to reimagine the provider recruiting and onboarding experience by providing role-based, electronic workflows that streamline and automate recruiting and onboarding tasks while delivering full visibility into the process to all stakeholders.

CredentialStream + Onboard

CredentialStream includes everything you need to request, gather, and validate provider information and create a Source of Truth to serve downstream processes.

Onboard delivers role-based, electronic workflows that streamline and automate recruiting and onboarding tasks.

Onboard Highlights

Platform

- Providers and stakeholders can view/complete tasks online via a mobile-friendly Hub
- Use QuickViews to filter and sort data for rapid status updates
- Empower physician liaisons with CRM functionality

Content

- Leverage integrated vContent for pre-built, best practices
- Instantly deploy onboarding workflows across multiple departments

Data

- Improve operations with Onboard and Recruiting Insights
- Increase insight with efficiency, satisfaction, acquisition, market, and referral analytics

Who It's For

Anyone involved in provider onboarding within their organization:

- HR/Physician Liaison/Navigators
- Physician Leaders
- Medical Staff Office
- Provider Enrollment/Revenue Cycle
- Medical Group/Ambulatory Surgery Center Administrators

Why You'll Love It

- Increase physician satisfaction and engagement
- Accelerate onboarding and avoid negative financial impacts caused by delays
- Standardize practices and increase efficiencies and alignment across departments
